PROFESSIONAL SUMMARY

Computer Science student at Qena University with practical experience in Python, C++, SQL, JavaScript, web development, machine learning, and embedded systems. I've worked on projects in computer vision, IoT, web development, and data processing, while building my problem-solving skills through algorithms, competitions, and real-world projects. I'm currently learning web scraping and exploring data-driven development, with the goal of bringing my software, AI, and hardware experience together and growing into a well-rounded software engineer.

EDUCATION

Bachelor of Computers and Information at Qena University, Qena, Egypt	Oct 2024 – Jul 2028
IBM Data Scientist Track held by Digital Egypt Pioneers Initiative (DEPI) Covering Python, machine learning, data visualization, and AI development	Jul 2026 – Present
Code With Klossy, Web Development Scholar JavaScript · HTML · CSS, selected for a competitive international coding summer program at age 16	Jul 2022 – Aug 2022
STEM High School, Qena, Egypt	Oct 2020 – Jul 2024

EXPERIENCE

Coach & Lead Trainer at Qena University, Qena	2024 – Present
- Grew Robotex at Qena University from a small club into a structured program reaching 50+ students, guiding it as coach and lead trainer. - Ran the university-wide Robotex competition including the judging criteria, scoring system, and event logistics. - Recognized as the 2nd best and most impactful student activity university-wide (May 2025).	
Team Lead, NASA Space Apps Challenge, Egypt	Aug 2025 – Nov 2025
- Led a team of 6 in building a hardware-software heat-therapy system for real-time monitoring of rheumatoid arthritis patients. - Under competitive settings, the team successfully simulated the heat-therapy system and executed it flawlessly.	
Fab Lab Leader at STEM School, Qena	Oct 2023 – Jul 2024
- Managed the school's Fabrication Laboratory (fab lab), training and directing around 20 students through practical workshops. - Taught lab fundamentals, electronics, and digital fabrication, including laser cutters, CNC, 3D printers, and vinyl cutters.	
Volunteer Arduino Instructor, Fabrication Laboratory, Qena	Nov 2023 – Dec 2023
Taught Arduino fundamentals to 40 beginner students, reaching a 90% course completion rate with strong feedback.	
Team Supervisor, Security Monitoring System at STEM School, Qena	Apr 2024 – Jun 2024
Supervised 4 junior developers building an IoT security monitoring system, guiding the team to hit deadlines through deployment.	

COURSES & CERTIFICATIONS

– Generative AI at CIB Summer Internship Program (Certificate of Attendance)	Aug 2026 – Aug 2026
– Fundamentals and Applications in Artificial Intelligence , The British University in Egypt (BUE), School of Continuing Education & Faculty of Engineering, 12 hrs.	Aug 2026 – Aug 2026
– Web Development Curriculum , Code With Klossy	Jul 2022 – Aug 2022

SKILLS

- **Technical:** C++, Python, JavaScript, Frontend Development, Arduino, Embedded Systems, IoT, Sensor Integration
- **Tools:** Git, GitHub, VS Code, Arduino IDE
- **Languages:** Arabic (Native), English (Fluent), Spanish (Basic)

PROJECTS

Heat Therapy System for Rheumatoid Arthritis, Arduino · C++ · Sensors	Aug 2025 – Nov 2025
- Built a hardware-software system pairing embedded temperature sensors with a heat-therapy control loop for medical use. - Handled the technical stack from sensor integration and hardware assembly through to the software logic and final working prototype.	
Glasses Detection System, Python · OpenCV	Jul 2026 – Present
- Built a real-time computer vision system that detects whether a person is wearing glasses from a live camera feed, covering face detection, feature extraction, and binary classification. - Developed independently the whole project, from raw image input through real-time classification output.	

EXTRACURRICULAR ACTIVITIES

- Won 2nd place regionally at the NASA Space Apps Challenge (Nov 2025) with a full hardware-software health-tech prototype for rheumatoid arthritis patients.
- Helped in running the Robotex season at the university, recognized as the 2nd best and most impactful student activity university-wide (May 2025).
- Picked as one of three school representatives to present at the Minister of Education's national Education conference presented live on air in January 2024.
